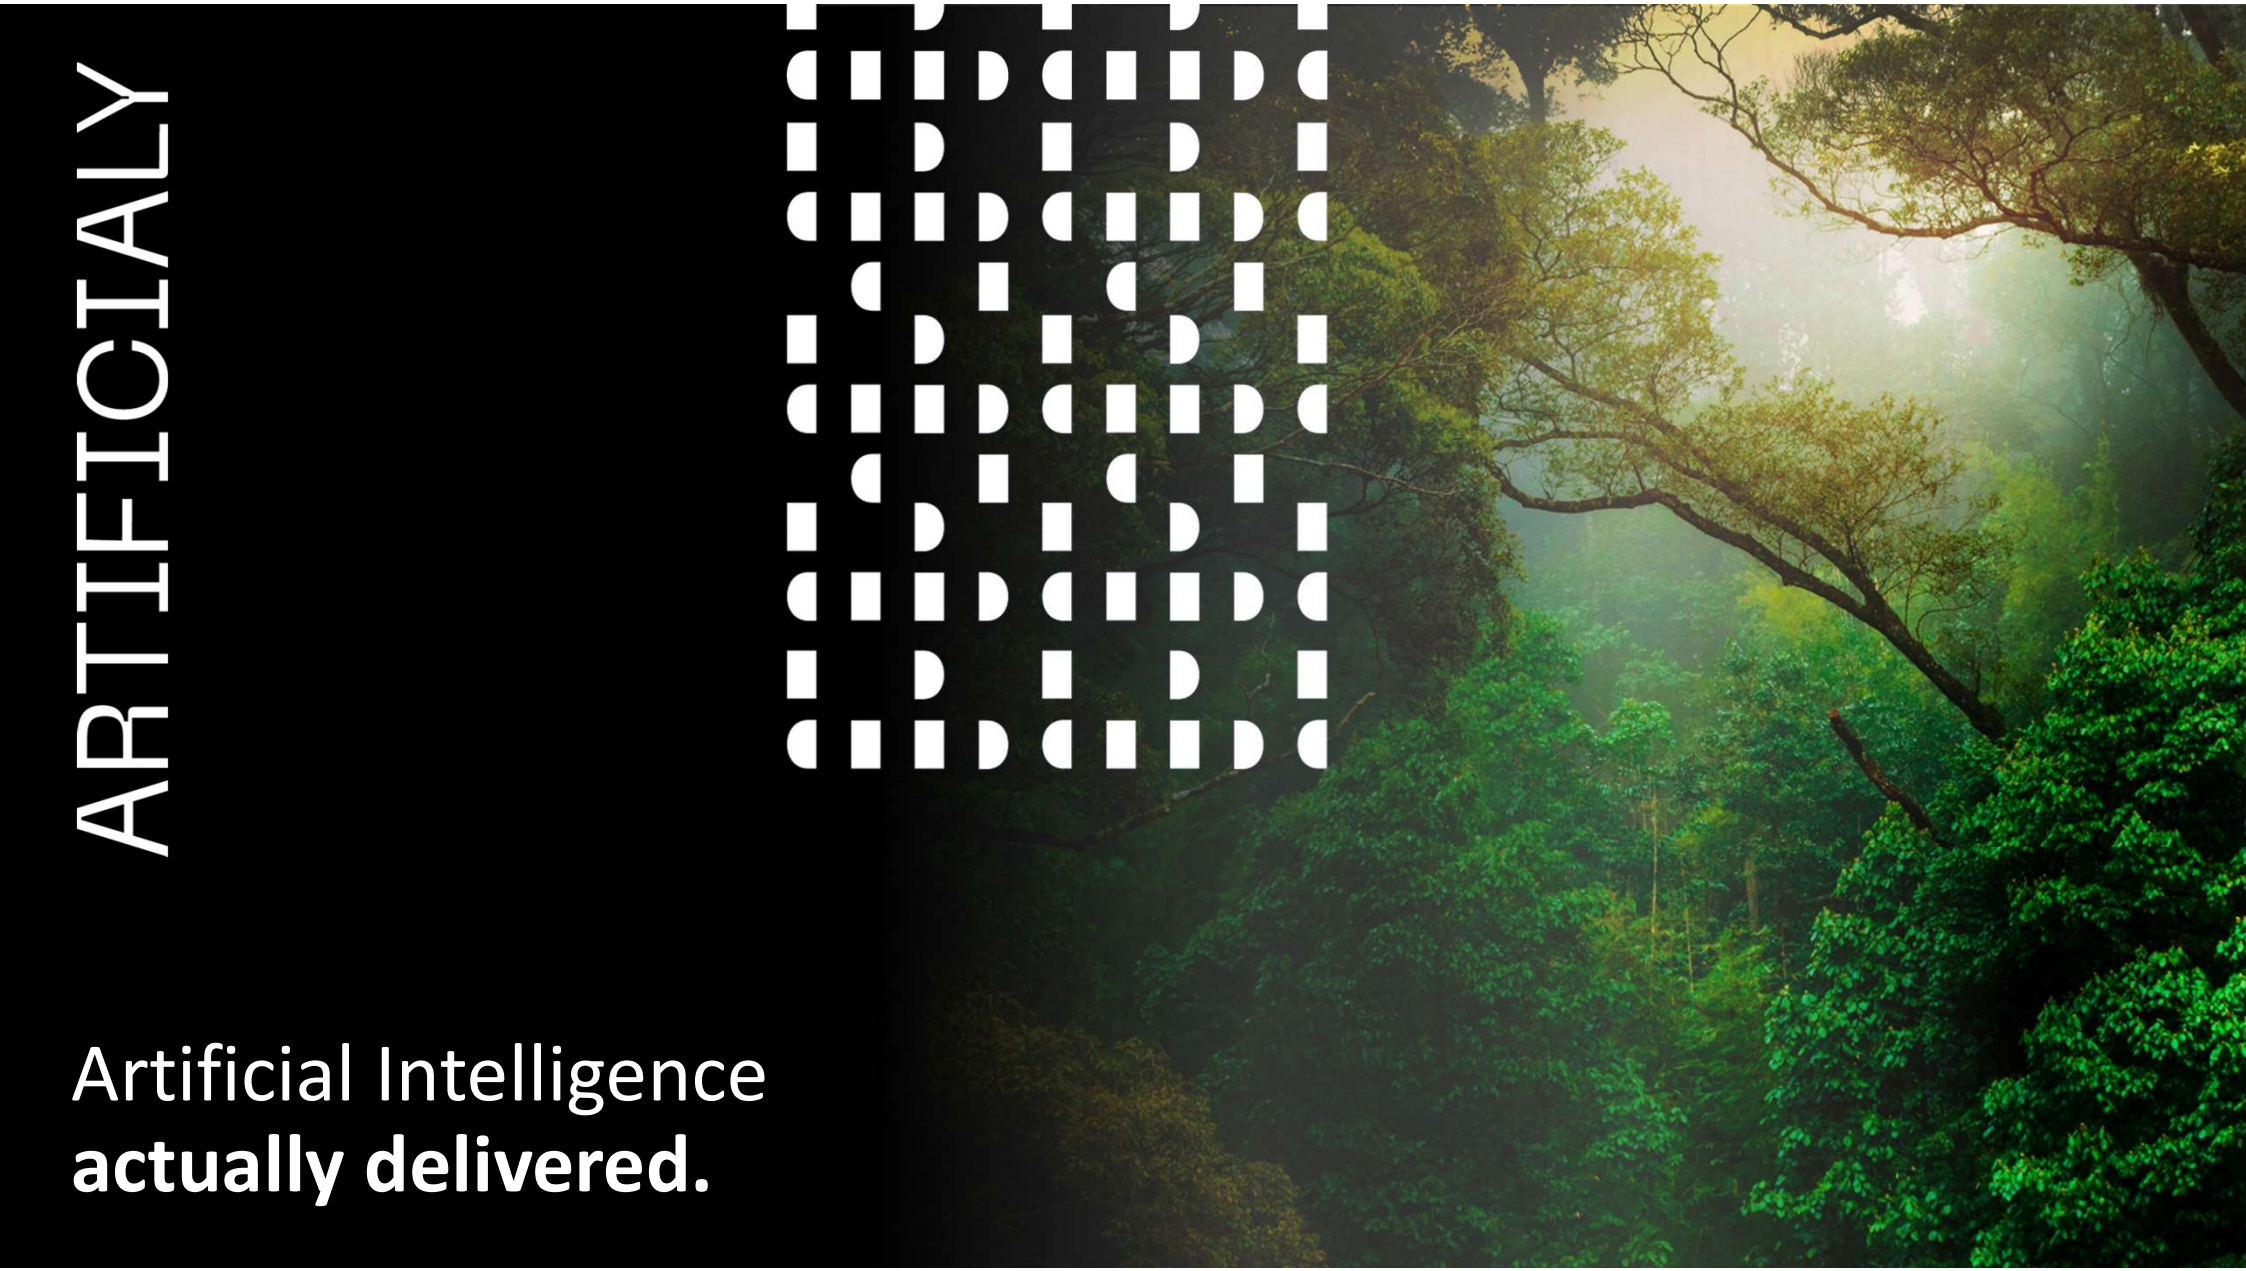
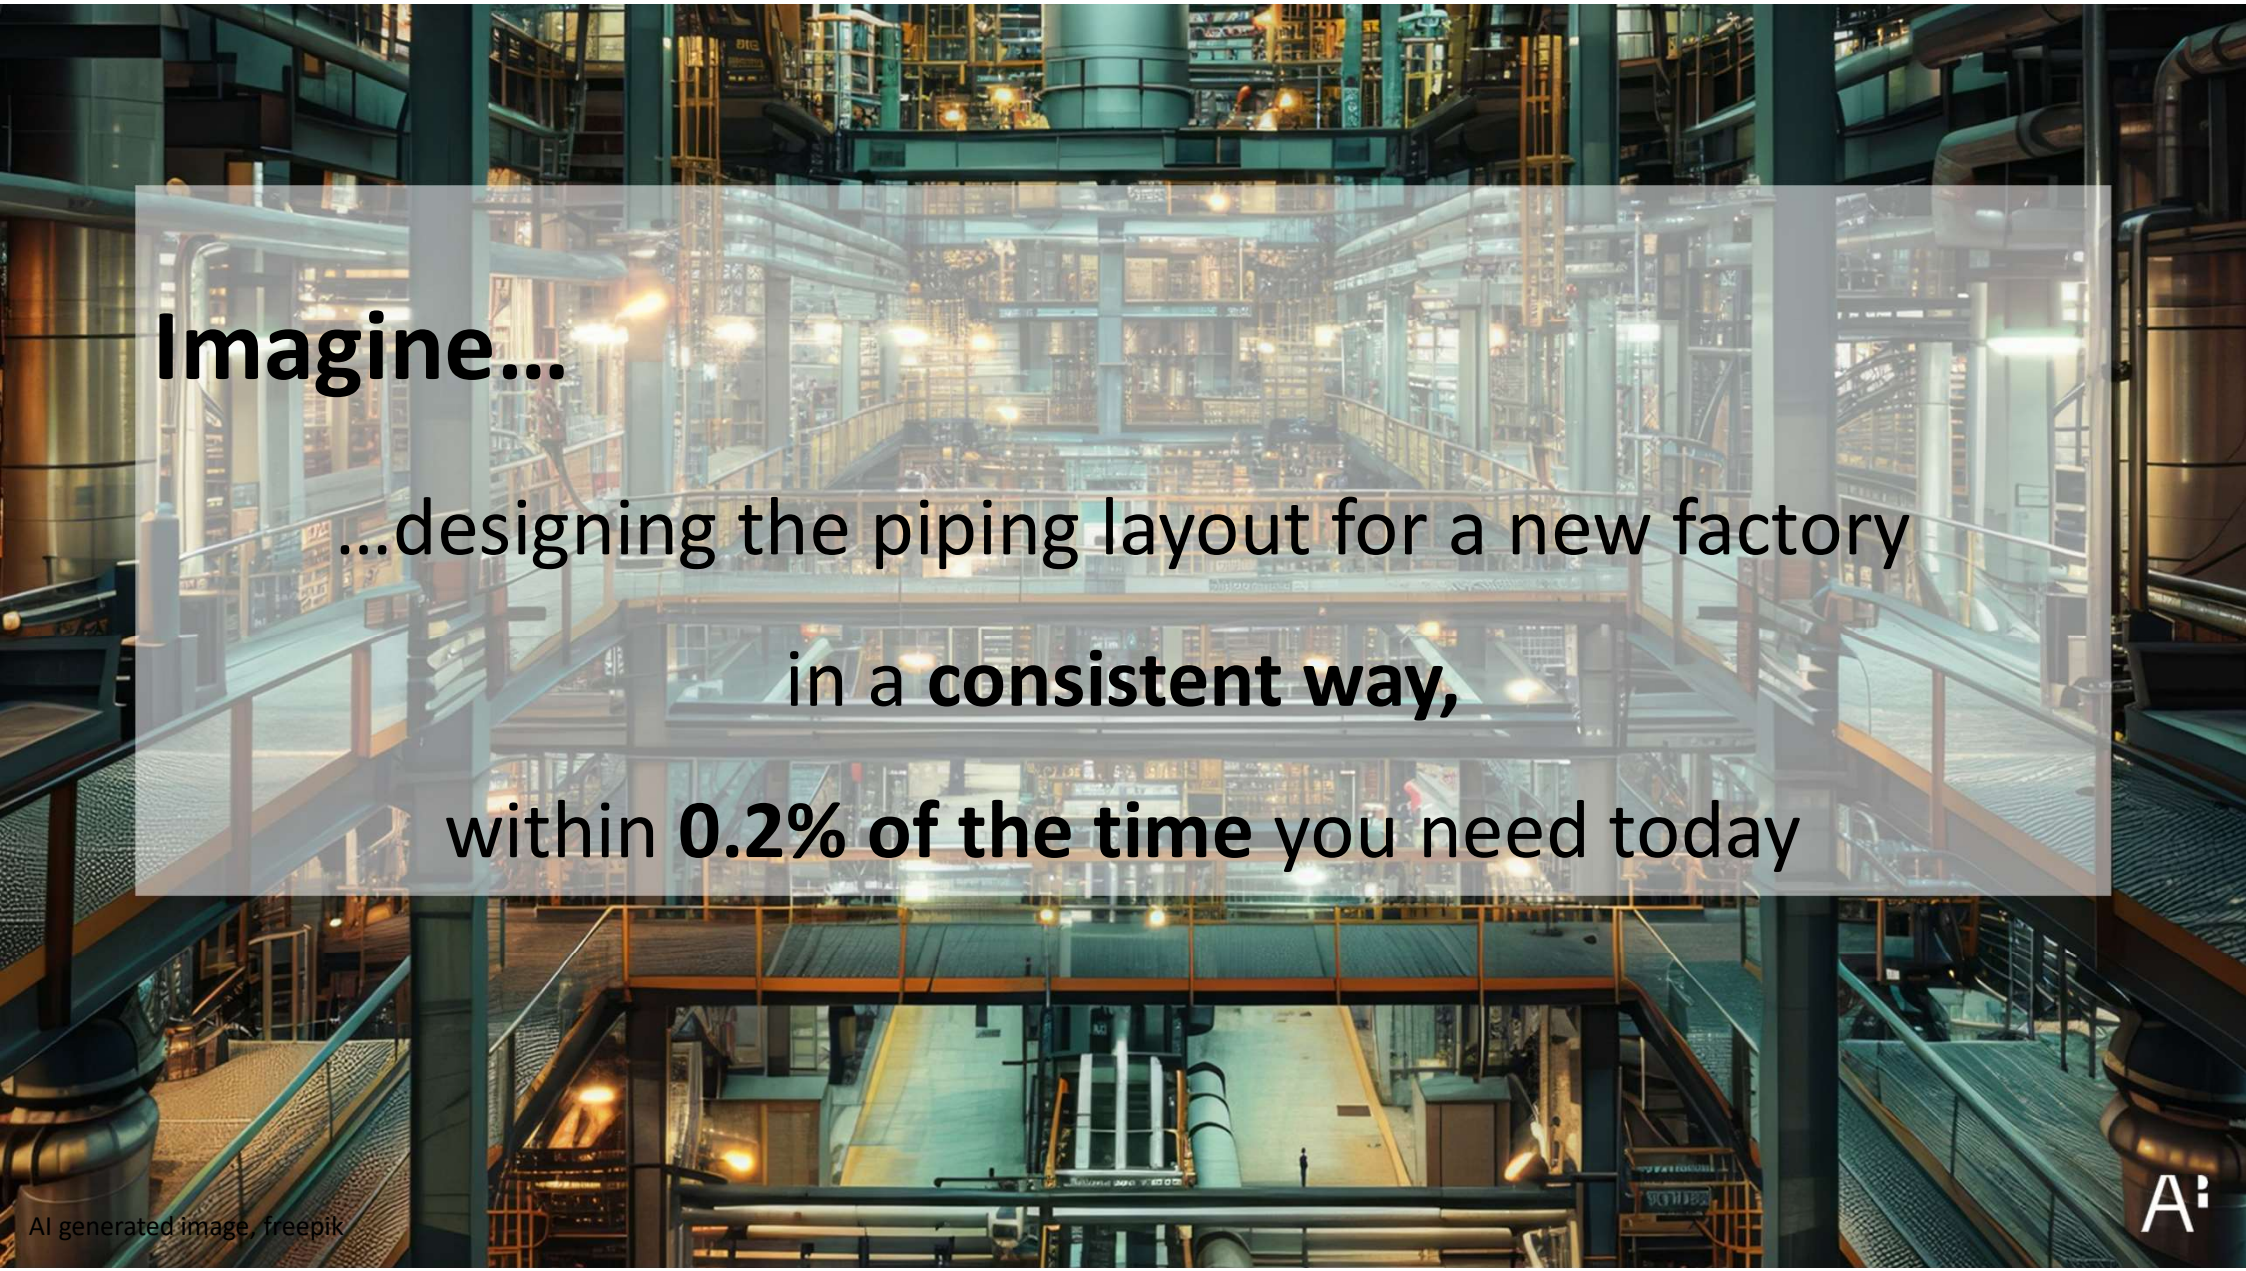
ARTIFICIALY



Artificial Intelligence
actually delivered.



Imagine…
…designing the piping layout for a new factory
in a **consistent way,**
within **0.2% of the time** you need today
AI generated image, freepik

… and it’s real:

Smart Process Automation

Industrial chemical plant global supplier

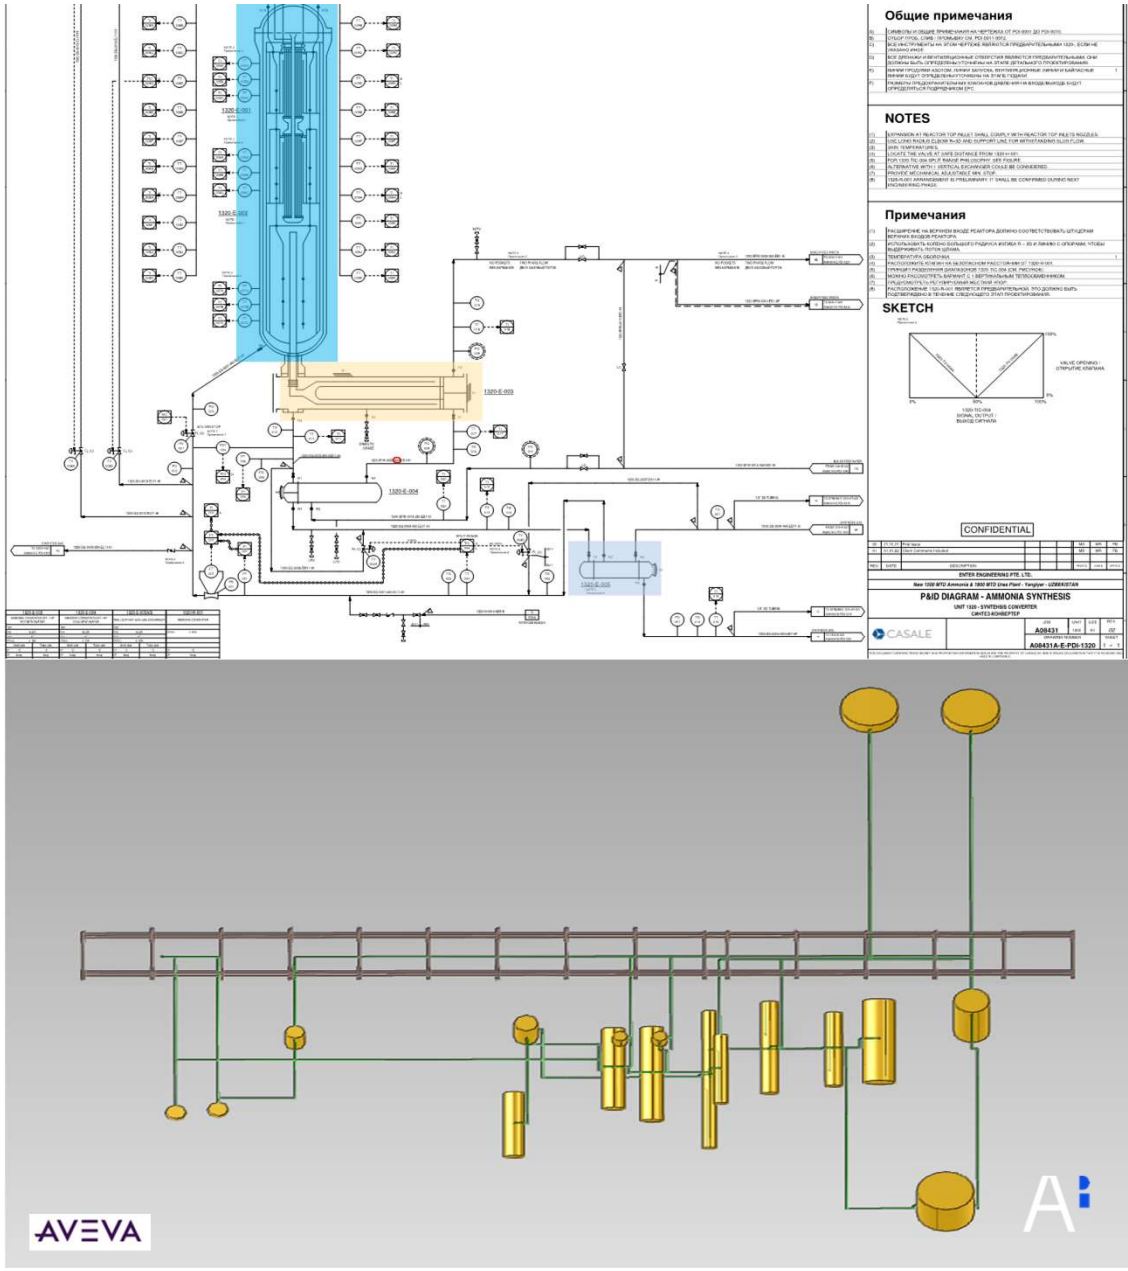
CASALE

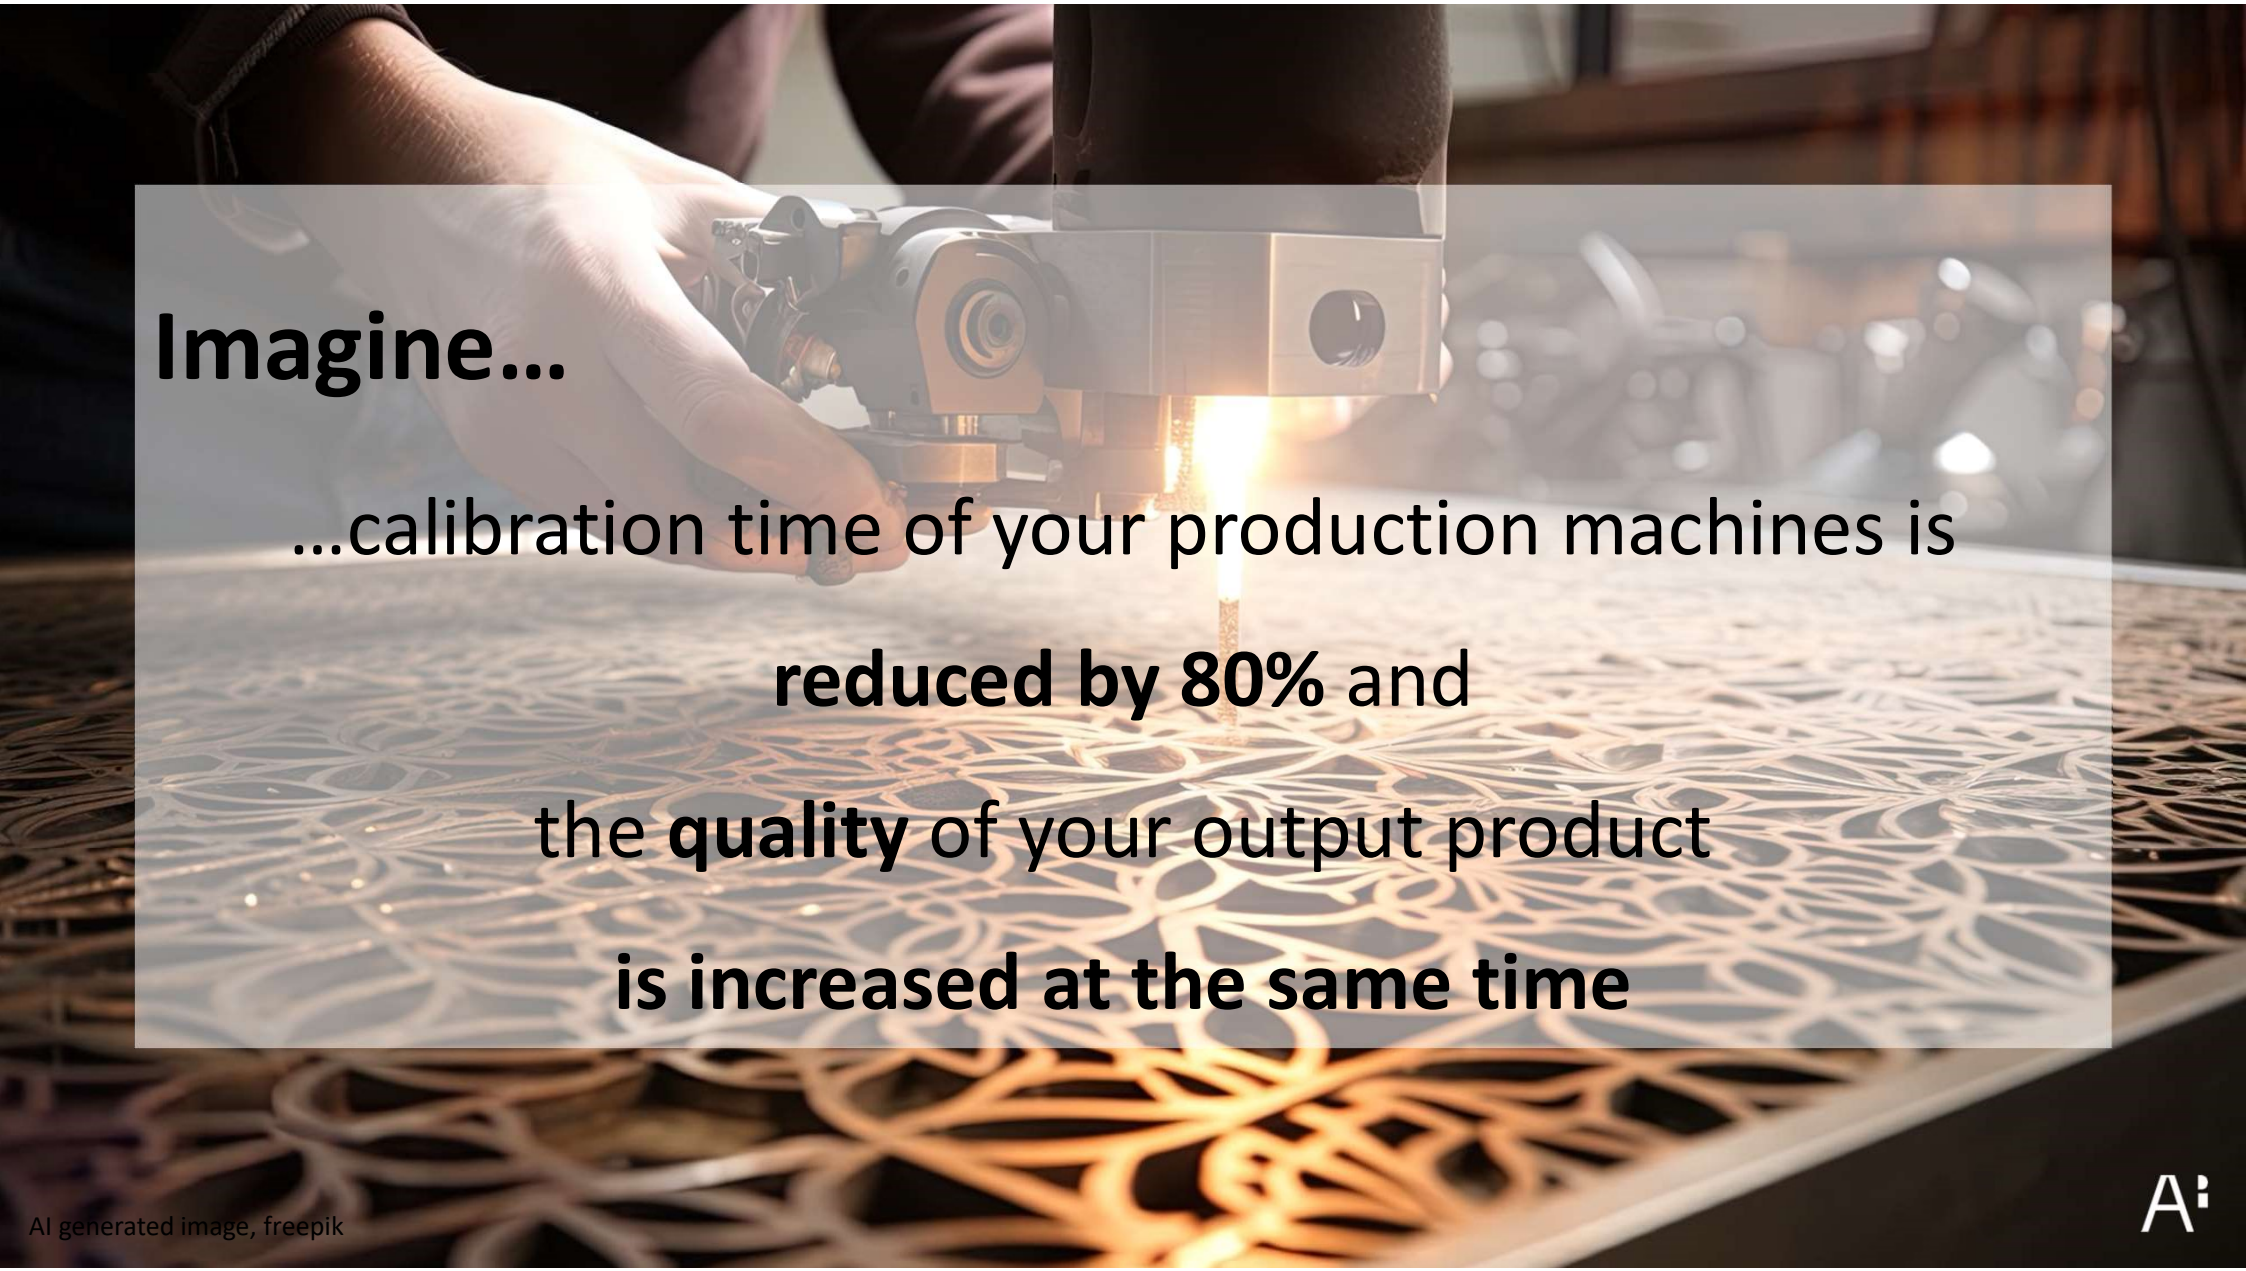
- ✓ **"Smart" digitization** of engineering documentation
- ✓ **Automated and optimized** piping design
- ✓ **Fully integrated** into the Casale environment

80% reduction in design time:
from months, to minutes

Consistency in results

Higher quality deliverables





Imagine…

…calibration time of your production machines is

reduced by 80% and

the **quality** of your output product

is increased at the same time

AI generated image, freepik

… and it’s real:

Parameter Optimization

Industrial Laser cutting machine producer

Bystronic

- ✓ **Self-learning** parameter optimization
- ✓ **Low-skill** rating system
- ✓ **Fully integrated** into Bystronic machines

80% reduction in calibration time

Doesn’t require skilled operators

20% increase on machines’ ROI thanks to increased production speed and output quality

No need for further customizations: *independent from cut material’s characteristics*

ARTIFICIALY

brings your

IMAGINATION

to life
